

## EcoBloom "L" 3-0-0 part A

**MIXING INSTRUCTIONS:** Mix 2 tsp. (10ml.) of PART "A" (GOLD COLOR) per gallon (3.8 liters) of water and mix an equal amount of PART "B" (GREEN COLOR) to the water.

**OUTDOORS:** For use on flowers, fruit, gardens and shrubs in soil - mix 2 tsp. (10ml.) each of PART "A" and PART "B" per gallon (3.8 liters) of water. Saturate area around plants once a week. Water normally between feedings.

**INDOORS:** For use on houseplants and herbs growing indoors or in a greenhouse in soil. Mix 1 tsp. (5ml.) each of PART "A" and PART "B" in 1 gallon (3.8 liters) of water. PART "A" and PART "B" should be dissolved separately, then combined. Saturate area around plants every 1 to 2 weeks. Water normally between feedings.

**SEEDS, CUTTINGS and FOLIAR SPRAY:** Use 1/2 to 1 tsp. (2.5-5 ml.) per gallon 1 to 2 times per week. Keep seeds and cuttings in a moisture tent until rooted.

**SOILLESS CULTURE (HYDROPONICS):** Adjust water to a pH of 5.5-6.5, (Slightly acid), Mix 2 tsp. (10 ml.) of PART "A" per gallon of water and 2 tsp. (10ml.) PART "B" per gallon (3.8 liters) of water, to make the nutrient solution. Correct the pH and PPM (parts per million, or EC) of dissolved salts to suit the type of plants and growing conditions they require. Flush the growing medium (root zone) with fresh water every 2-3 weeks and replenish with fresh nutrient solution.

**CAUTION:** Do not mix concentrates of "A" and PART "B" together, they must first be diluted. Do not store below freezing or above 150 degrees F (50° C). If crystals should form in cold storage, immersing container in hot water for 10-30 minutes should re-dissolve them.
