

EcoGrow "S" 15-7-12

INSTRUCTIONS:

EcoGrow "S" is formulated for subtropical plants. Contains major and trace elements required by plants. Promotes strong vegetative growth in plants grown in soil or hydroponics. Promotes lush green growth on most subtropical plants, vegetables, trees and shrubs through the use of fast acting forms of nitrogen. Use EcoGrow "S" until plants have reached the desired size, height and stage of maturity. Then begin the application of EcoBloom.

DIRECTIONS FOR USE:

OUTDOORS: Dissolve 2 tsp. to 1 tbs. (10-15g.) in 1 gallon (3.8 liters) of water. Adjust pH if required. Saturate area around the base of plants once a week. Water normally between feedings. EcoGrow "S" can be broadcast around garden plants by hand, then watered in. (1 lb. Covers 300 square feet). Dilute 50% for spray applications (1/2 - 1 tsp. or 2.5g - 5g per gallon of water.)

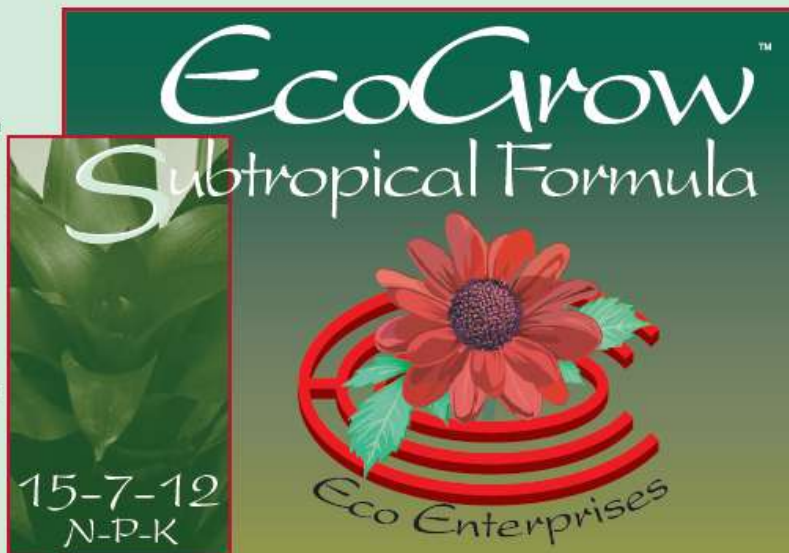

INDOORS: Dissolve 1 tsp. (5g.) per 1 gallon (3.8 liters) of water for slow growing or young plants. Use 2 tsp. (10g.) in 1 gallon for faster growing and larger plants. Saturate area around the base of plants once a week. Water normally between feedings. (Applies also in indoor plants under artificial lighting.)

HYDROPONICS: Flush system thoroughly with fresh water. Adjust water to a pH of 6.2-6.5. Dissolve 2 tsp. (10g.) per 1 gallon water (3.8 liters). 1 lb. of concentrate makes 45 gallons of nutrient solution. Feed 2 to 3 times per day in gravity flow systems. Flush and replenish with fresh nutrient every 10 days to 2 weeks as recommended by system manufacturer.
