

# GENERAL ORGANICS®

## Soil / Soiless Feeding Schedule

### Bio Root

### BioThrive Grow

### CaMg+

### Bio Weed

### BioThrive Bloom

### Bio Bud

Soil / Soiless Feeding Schedule	Bio Root	BioThrive Grow	CaMg+	Bio Weed	BioThrive Bloom	Bio Bud
<b>Week 1 Rooted cuttings</b> (18 Hour Photoperiod)	5ml	5ml	5ml	2.5ml	~	~
<b>Week 2 Veg</b>	10ml	10ml	5ml	2.5ml	~	~
<b>Week 3 Veg</b> (repeat for extra veg weeks and donor's)	10ml	10ml	5ml	2.5ml	~	~
<b>Week 4 Transition</b> (12Hour Photoperiod)	10ml	10ml	5ml	2.5ml	~	~
<b>Week 5 Early Flower</b>	10ml	~	5ml	2.5ml	10ml	2.5ml
<b>Week 6 Early Flower</b>	5ml	~	5ml	~	10ml	2.5ml
<b>Week 7 Mid Flower</b>	5ml	~	5ml	~	10ml	2.5ml
<b>Week 8 Mid Flower</b>	~	~	5ml	~	10ml	2.5ml
<b>week 9 Late Flower</b>	~	~	5ml	~	10ml	2.5ml
<b>Week 10 Late Flower</b> (repeat for extra flowering weeks)	~	~	2.5ml	~	10ml	2.5ml
<b>Week 11 Ripen/Rinse</b>	~	~	~	~	~	~

- Repeat week 10 in program for extended flowering
- We recommend to increase app rates X2 for heavy feeding plants
- Keep nutrient reservoir aerated

- We recommend the addition of Microbiological inoculants such as GH SubCulture-M and SubCulture-B to aid in nutrient uptake
- Always use unchlorinated water
